Muhammad Fahrizaldi

Web Developer · Music Producer

Email: aldimf26@gmail.com WhatsApp: +62 895 4131 1053 Website: aldimf.vercel.app
GitHub: github.com/aldmf26 Location: Banjarmasin, Indonesia

Summary

Web Developer skilled in building websites with WordPress, CodeIgniter and Laravel, and in managing databases such as MySQL and Elasticsearch. Experienced in designing information systems for several industries, including restaurants, livestock farming, shipping and edible bird's nest export. Proficient in network setup with Mikrotik, internet installation (including fiber optic and Starlink) and system administration. As a Music Producer, creates electronic music in FL Studio and plays piano and drum pads.

Experience

Web Developer, IT Support, Programmer

PT Agrika Gatya Arum, CV Agrilaras, Takemori & Soondobu Restaurants, Orchard · Banjarmasin & Pelaihari, Indonesia · 2022 - Present

- Developed a bird's nest sales system for PT Agrika Gatya Arum with Laravel 8 and MySQL, including division-based payroll (cleaning, molding, sorting) with weight and shrinkage reporting.
- Designed a cashier application for Takemori & Soondobu restaurants in Banjarmasin with Laravel, covering staff advances, penalties, waiter points, kitchen orders, payroll and sales reports.
- Developed a salon management system for Orchard: therapist appointments, POS, products and services, stock taking, customers, discounts, down payments, invoices, voids, attendance, staff advances, penalties, tips, commissions, payroll, and revenue and sales reports.
- Built an information system for a poultry farm at CV Agrilaras with Laravel and MySQL, covering flock counts, feed and eggs, plus accounting for profit and loss, balance sheet and journal reports.
- Built a system for PT Virgo Karya Shipping: purchase orders, payments, multi-vessel receiving, stock ledger, fuel usage, variances and role-based verification, integrated with accounting journals, general ledger, payables, opening balances, costing, dashboards and Excel stock reports.
- Managed network installation and configuration with Mikrotik and Ruijie Reyee to distribute internet across every office floor, with IndiHome as the main uplink.
- Installed internet infrastructure at a remote forest site for CV Agrilaras, including fiber optic cabling, LHG antennas and Starlink configuration.
- Maintained databases and systems to keep operations fast and secure.

Web Developer

Rukita.id · Yogyakarta, Indonesia · January 2020 - September 2020

- Developed an e-commerce website with WordPress.
- Built a website with CodeIgniter 3 and an Elasticsearch database for fast, efficient search.

Education

Bachelor of Information Systems

Universitas Islam Kalimantan Muhammad Arsyad Al Banjari · Banjarmasin, Indonesia · 2017 - 2021

GPA 3.60 / 4.00
